

Recognized in 2016 as one of the top combination camps in the country.

This year's theme: Cybersecurity and the Internet of Things

JULY 24TH TO AUGUST 4TH (TEACHERS)

JULY 31ST TO AUGUST 4TH (STUDENTS)

Apply Now at: www.nebraskagencyber.com

Explore the Internet of Things

This year's theme involves building and tinkering with IoT devices. Students AND teachers will get to make IoT apps, break them to learn about the security vulnerabilities, and then tweak them to make them safer and more secure.

Learn about Cybersecurity

Students will get to talk to real security professionals, investigate cybersecurity careers, and learn skills that real practitioners use. Several demos and hands-on activities will feature wireless drones and IoT apps that collect sensor data and upload it online. There will also be a large capture the flag competition for students and teachers on the last day of camp.

Create lessons and clubs

Teacher participants will not only experience the fun, hands-on, IoT and cybersecurity activities that students will do, but will also get a chance to make IoT and cybersecurity curricula of their own. We will have professional expert teachers on hand to help you translate what you learn at camp into your own classrooms.

Nebraska GenCyber is sponsored by the National Security Agency and the National Science Foundation
